Photo 7873

Mounting instruction:

- The original threaded plates from the inside of the mudguard remain on the motorbike.
- The screws are pushed through the original thread.
- The distance tubes are mounted between the baggage holder and the cover.

Care and servicing:

To reach a long live span of our chromium-plated articles they should be cleaned regularly and be treated with customary chrome care means.

With powder coated articles a regular cleaning is important. Damages (e.g. by rockfall) can be mended with colour.

By both versions we recommend about the winter the spraying or rubbing with corrosion protection oil or silicone.

All fixing bolts must be checked at regular intervals (max. 6 months).

We wish you a lot of joy and accident-free journey with our motorcycle accessories.
